

SBD-ANT-12GGGL

High performance ruggedized survey mount GNNS antenna

The SBD-ANT-12GGGL features a distinctive high performance quad-feed element, out-of-band filter, limiter, and a high reliability low noise (1.4dB) high gain (43dB) LNA, specifically designed for high-precision geodetic-grade applications, including reference stations, survey, ground, marine, portable and aviation.

The SBD-ANT-12GGGL receives L1, L2 and L5 GNSS frequencies and offers combined GPS + GLONASS + Galileo + BeiDou signal reception. Customers can use the same antenna for GPS only, dual- or triple-constellation applications to increase flexibility and reduce equipment costs.
